Burleson City Council members approved an engineering services contract for the design of a north-south connector road east of I-35W and McCall Street in Burleson.

The design contract with Freese and Nichols, Inc., is for \$483,300. The estimated construction cost for the road is \$4.942 million. Funds for the design of the road are available through the 2007 bond sale of street and drainage certificates of obligation bonds.

The north-south connector road will provide additional traffic circulation from Alsbury Boulevard to FM 3391 (East Renfro Street) and provide both a way in and a way out for many properties that front the I-35W frontage road. The connector road will be a four-lane undivided road that is approximately 3,600 linear feet long.

The road was identified in the 2005-2009 Capital Improvements Plan that was presented to Burleson City Council members in 2004.
