HEALTH INSPECTIONS

Inspection scores explained

Food facilities are scored on demerit system for full inspections.

A score of 0 is essentially perfect while a score of 30 or more is considered failing.

Failing score will require a timely follow-up to ensure corrections are made.

Complaints, follow-ups, temporary or preoperational inspections may be unscored due to the fact that they could be solely addressing specific issues.

Pools/spas and interactive water features are inspected on pass/fail basis. Where life safety is at risk a failure is noted and the facility is closed until a follow-up and correction is made.
